

AUSTRALIAN CUT FLOWERS

Botanical Name

Acacia
Actinotus helianthi
Alyogyne huegelii
Anigozanthos
Baeckea virgata
Banksia
Boronia
Callistemon
Ceratopetalum gummiferum
Chamalaucium
Conostylis
Correa spp
Corymbia ficifolia
Crowea
Dendrobium
Epacris
Eucalyptus
Grevillea
Hardenbergia
Isopogon
Leptospermum
Melaleuca
Micromyrtus ciliata
Ozothamnus
Philotheca
Pimelea
Prostanthera
Rhodanthe
Telopea
Thryptomene
Xerochrysum syn. Bracteantha
Westringia

Common Name

Wattle
 Flannel Flower
 Native Hibiscus
 Kangaroo Paw
 Tall Baeckea
 Banksia
 Boronia
 Bottlebrush
 NSW Christmas Bush
 Geraldton Waxflower
 Cotton Heads
 Native Fuschia
 Flowering Gum
 Wax Flower
 Rock Orchid
 Native Heath
 Gum Blossom
 Grevillea
 False Sarsaparilla
 Drumsticks
 Tea-tree
 Paperbark
 Fringed Heath Myrtle
 Rice Flower
 Native Daphne
 Rice Flower
 Mint Bush
 Paper Daisy
 Waratah
 Thryptomene
 Golden Everlasting
 Native Rosemary

SOUTH AFRICAN CUT FLOWERS

Botanical Name

Leucadendron
Leucospermum
Protea

Common Name

Conebush
 Pincushion
 Sugarbush

FOLIAGE

Botanical Name

Acacia covenyi
Acacia cultriformis
Adenanthos
Adiantum
Baloskion (syn. Restio)
Doryanthes
Eucalyptus cinerea
Eucalyptus globulus
Lomandra
Xanthorrhoea

Common Name

Bluebush
 Knife Wattle
 Woolly Bush
 Maidenhair Fern
 Tassel Cord Rush
 Gymea Lily
 Silver Dollar/Argyle Apple
 Blue Gum
 Mat Rush
 Steel Grass/Grass Tree

NUTS & BERRIES

Botanical Name

Acmena
Banksia
Corymbia
Eucalyptus

Common Name

Lilly Pilly
 Banksia
 Bloodwood
 Gum Tree

Australian Native Cut Flowers

Australian Floral Displays

In a vase on the kitchen table, in a wedding bouquet or buttonhole, or a handpicked gift to show your love to that special someone, Australian native flowers have much to offer the cut flower industry and home gardener with a wealth of colours and textures to play with.

NATIVE FLOWERS

Australia has a diverse and unique native flora. It has been estimated that there are up to 25,000 different plant species in Australia. With this wealth of amazing plant material at our disposal it is difficult to understand why we do not use more natives for floral displays in our homes.

The majority of Australian native plants have their main flowering period over winter and spring. However with careful selection you can manage to have bountiful and exquisite floral displays all year round.

At the beginning of winter the bold bright flowers of Banksias, golden glow of Wattles, and the soft white and pink Native Daphnes

make welcome additions in our homes providing colour and fragrance.

With the arrival of spring a bounty full of native flowers is at our disposal for creative use in the home. The fragrance of Boronias, Wax flowers and Scented Paperbark fill the air whilst the bold and colourful displays of some of our iconic native

plants take centre stage. Our Waratah, Bottlebrush, and Tea-trees flower with such abundance that they cannot be ignored when selecting material for

displays. The beauty of our local Flannel Flower inspires all who see.

As Christmas approaches, Kangaroo Paws, NSW Christmas Bush, our local Mint Bush, and Baeckea put on a show for us.

Foliage and other produce from our gardens are welcome additions to floral displays. A rich choice of foliage, fruit, nuts, and barks are available from our native plants to complement and enhance any creative endeavour. The grey-blue foliage of some of our Eucalyptus trees are prized around the world for their addition to bouquets.

Several South African species such as Proteas, Leucadendrons, and Leucospermums grow well in Australian gardens and blend well in native floral arrangements.

Having our homes surrounded by native plants adds colour and vibrance, and brings a bounty of birds and their songs to enrich your soul.
